PROFESSIONAL SUMMARY

Software Engineer Fresher with hands-on experience developing full-stack applications using Java, Spring Boot, Hibernate ORM, MySQL, and JavaScript. Built a Healthcare Appointment Platform featuring RESTful APIs, CRUD operations, authentication, and responsive UI design. Strong foundation in OOP, Data Structures & Algorithms, SQL, and Software Engineering principles.

TECHNICAL SKILLS

- **Languages & Databases:** Java 8+, SQL, JavaScript, HTML5, CSS3, MySQL
- **Frameworks & Backend:** Spring Boot, Spring MVC, Spring Data JPA, Hibernate ORM, JDBC, Spring Security, Servlets
- **Web & API Development:** RESTful APIs, JSON, AJAX, Fetch API, Bootstrap 5, Responsive Web Design, Postman
- **Security:** Spring Security, BCrypt Password Encryption, Authentication & Authorization
- **Architecture & Tools:** OOP, Data Structures & Algorithms (DSA), SOLID Principles, Design Patterns (MVC, Singleton), Git, GitHub, Maven, Docker

PROJECTS

Healthcare Appointment Platform — Java, Spring Boot, Spring MVC, Hibernate ORM, MySQL, HTML5, Bootstrap 5, JavaScript, AJAX, Maven GitHub

- Developed a full-stack Healthcare Appointment Platform supporting **Doctor Management, Patient Management, Appointment Scheduling, and Medical Records**, by designing a layered architecture using **Java, Spring Boot, Hibernate ORM, and MySQL**.
- Engineered **RESTful APIs** enabling end-to-end **CRUD operations** across 5+ healthcare modules, by leveraging **Spring MVC, Spring Data JPA, Hibernate ORM**, and relational database design principles.
- Implemented Spring Security, BCrypt authentication, Bean Validation, and Global Exception Handling to improve application security and data integrity.
- Built a **responsive user interface** with **HTML5, Bootstrap 5, JavaScript, AJAX, and Fetch API**, enabling seamless frontend-backend integration and real-time data interactions.

Banking Management System — Java, JDBC, MySQL GitHub

- Developed a Banking Management System to manage accounts, deposits, withdrawals, fund transfers, and balance inquiries using Java, JDBC, and MySQL.
- Implemented PreparedStatement-based database operations to prevent SQL injection vulnerabilities and improve database security.
- Applied ACID transaction principles and exception handling techniques to maintain data consistency and reliability during financial operations.

TRAINING / COURSE

Full Stack Java Development — XWorkz ODC

- * **Enterprise Java Development:** 400+ hours of hands-on training covering Core Java, J2EE, Spring Boot, Hibernate, and web technologies.
- * **Backend Development:** Built RESTful APIs with Spring MVC, ORM with JPA/Hibernate, and advanced SQL optimizations.
- * Optimized database performance by restructuring complex SQL queries and implementing targeted indexing to minimize query response latency.
- * **Java 8 Features:** Proficiency in Streams, Lambda Expressions, Date and Time API, Optional class, Default and Static Methods, Method Reference, Functional Interfaces, and Collections Framework (List, Set, Map).

EDUCATION

Cambridge Institute of Technology
Bachelor of Engineering in Computer Science

2020-2024
Bangalore, Karnataka
