

Saqib Rashid Bhat

Machine Learning Engineer | AI / LLM & RAG Systems

+91-6005370241 | saqib.bhat.x@gmail.com | linkedin.com/in/saqib-bhat-ai | portfolio | github.com/saqib-bhat

PROFESSIONAL SUMMARY

Machine Learning / AI Engineer with hands-on experience building **3 end-to-end AI applications**, including a **RAG-based Document Q&A Assistant**, an **LLM-powered Resume & Job-Match Assistant**, and a **Customer Churn Prediction System (0.84 ROC-AUC)**. Skilled in **Python, FastAPI, RAG, FAISS, Sentence Transformers, Docker, PostgreSQL, and MLflow**. Passionate about developing AI solutions that combine machine learning, LLMs, and backend engineering to solve real-world problems.

PROJECTS

Intelligent Document Q&A Assistant (RAG)

GitHub

Python, FastAPI, RAG, FAISS, Sentence Transformers, Groq (Llama-3.3-70B), PostgreSQL, MLflow, Streamlit, Docker

- Developed a **RAG-based Document Q&A Assistant** that ingests PDF, DOCX, and TXT files and answers questions using retrieved document context with source citations.
- Built the retrieval pipeline using **Sentence Transformers (all-MiniLM-L6-v2)** and **FAISS** to perform semantic search over document embeddings.
- Connected **Llama-3.3-70B (Groq)** through an OpenAI-compatible API to generate responses grounded in the retrieved content.
- Used **MLflow** to track experiments and monitor retrieval and response latency while improving overall pipeline performance.
- Exposed the application through a **FastAPI** backend and **Streamlit** interface, deploying it with **Docker Compose** and **PostgreSQL** for persistent conversation storage.

AI Resume & Job-Match Assistant

GitHub

Python, FastAPI, FAISS, Sentence Transformers, LLM, SQLAlchemy, Docker

- Built an AI-powered resume matching system that uses **semantic embeddings** to match resumes with job descriptions beyond keyword-based search.
- Implemented **resume parsing**, skill extraction, **semantic search**, ATS scoring, and LLM-generated resume improvement suggestions using **Sentence Transformers** and **FAISS**.
- Developed a **FastAPI** backend with **SQLAlchemy** for resume processing, job matching, and REST API integration.
- Containerized the application using **Docker**, making the system easy to deploy and extend with additional AI workflows.

Customer Churn Prediction System

GitHub

Python, Scikit-Learn, FastAPI, Docker, MLflow, Pandas, NumPy, Joblib, Pydantic

- Built a **Customer Churn Prediction** model using a **Random Forest classifier**, achieving **0.84 ROC-AUC** and **80% accuracy** on telecom customer data.
- Developed a reusable preprocessing pipeline with **ColumnTransformer**, **OneHotEncoder**, and **StandardScaler** to ensure consistent data transformations during training and inference.
- Deployed the model as a **FastAPI** REST API with **Pydantic** validation, **Docker** containerization, and **MLflow** for experiment tracking and model reproducibility.

TECHNICAL SKILLS

Languages: Python, SQL, Java

LLM / Generative AI: Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), Prompt Engineering, Semantic Search, Sentence Transformers, Dense Embeddings, Vector Search, Information Retrieval, OpenAI-compatible APIs

Machine Learning: Scikit-Learn, XGBoost, Random Forest, Logistic Regression, Classification, Feature Engineering, Cross-Validation, Hyperparameter Tuning, Model Evaluation, ROC-AUC

Backend Development: FastAPI, REST APIs, Pydantic, SQLAlchemy, Alembic

Databases: PostgreSQL, MySQL, FAISS (Vector Index)

Data Analysis: Pandas, NumPy, Data Preprocessing, Data Wrangling, Exploratory Data Analysis (EDA)

Tools & MLOps: Git, GitHub, Docker, Docker Compose, MLflow, Postman

EXPERIENCE

Herway Brew Labs

June 2025 – June 2026

Operations & Data Reporting

Bangalore, India

- Managed inventory, billing, vendor coordination, and operational reporting using Google Sheets and Swipe.
- Prepared sales and inventory reports to support data-driven planning and process optimization.

EDUCATION

Cambridge Institute of Technology

2020 – 2024

Bachelor of Engineering in Computer Science

Bangalore, Karnataka

Minor in Artificial Intelligence & Data Science (IIT Mandi × Masai School)

2025 – 2026

Machine Learning, Natural Language Processing, Deep Learning, Probability & Statistics, Data Analytics

Online
